PROFUNDO

Thank you for purchasing PROFUNDO by ImagikSound. PROFUNDO is an A.T.S. (Aleatory Texturizing Synthesizer) for Kontakt by Native Instruments ©. It gets six layers, each one with four different samples to create a texturized sound controlled by a random pitch engine, generating aleatory harmonies in a costant evolving mode. The moods are quite gloomy and dark, so perfect for Cinematic, Dark Ambient, Industrial and other musical genres related. Beware to volume when you create instruments because the amount of low frequencies. In the Instruments folder you will find some examples. You can start from the PROFUNDO init outside and then save you own instruments in the User folder as well.

In the next page you will find the GUI legenda to learn the use of the whole sections:

System Requirements

This library requires Native Instruments Kontakt Full version 5.8.1 or later. The sample files are compressed to lossless 96kHz and 24bit NCW audio format. Please read all instrument specs and software requirements before purchasing an ImagikSound product. You must have at least

Windows version 7 or later, or Apple OSX 10.10 or later. Many instrument presets in this library are extremely system resource intensive. We highly recommend that you have at least 4GB of system ram, a multi-core cpu and an 7200 rpm SATA or SSD hard disk before purchasing this particular ImagikSound library. Large sample sets like those found in this library may load slowly and may cause system instability on older machines.
